

## Thematic areas related to the International Standard on Sustainable Territorial Management

Thematic areas	Sub-areas
Sustainable Production	Carrying capacity
	Family farming
	Sustainable agriculture
	Land use, water use, energy use
	Agroforestry
	Forestry
	Integrated Crop Livestock Forestry Systems - ICLFS
	Eco-efficiency
	Renewable energy
	Energy efficiency
	Clean production
	Industrial production
	Non-renewable natural resources
	Production management
Industrial management	
Well-being	Joy/happiness
	Quality of life
	Prosperity
Biodiversity	Protected areas
	High Value Conservation Areas
	Degraded soil recuperation / Erosion
	Environmental restoration
	Landscape management
	Scenic beauty
	Sociobiodiversity
	Biodiversity corridors
	Endemic species
	Threatened species
	Natural ecosystems (Conservation Indicators / IRC)
	Natural forests
	Environmental resilience
	Biodiversity management
Production Chains	Organic and sustainable productive chains
	Product Life Cycle
	Product traceability
Natural Capital	Stock (environmental conservation and preservation)
	Ecosystem Services
	Valuation (PES, Environmental cost)
Citizenship	Social participation
Sustainable Cities	Smart/resilient cities

## Thematic areas related to the International Standard on Sustainable Territorial Management

Thematic areas	Sub-areas
	Sustainable buildings
	Infrastructure
	Bioconstruction
	Sanitation
	Recreational areas
	Urban agriculture
	Urban parks
	Local development (neighborhood)
	Entrepreneurship
	Intelligent transportation
Science and Technology	Innovation and creativity
	Generation of knowledge
Climate change	Deforestation reduction
	Nature based solutions
	Carbon Credit
	Clean Development Mechanism (CDM)
	Reduction of Emissions from Deforestation and Degradation (REDD)
Communities	Strengthening of Local/ Traditional communities
	Self-management
	Indigenous Communities
	Respect for Local/Traditional communities
Culture	Cultural diversity
	Cultural identity
	Tangible and Intangible Cultural Heritage
	Cultural promotion and development
	Belonging
	Traditions
Human Rights	Equity
	Legislation
	Social and Environmental law
	Ethics and transparency
	Law and social inclusion
	Health
	Spirituality
	Accessibility
	Immigration
	Social justice
	Freedom of Expression and Religion
	Food safety
Economy	Circular Economy (Life cycle / Reverse logistic)

## Thematic areas related to the International Standard on Sustainable Territorial Management

Thematic areas	Sub-areas
	Solidarity economy (fair trade, Cooperatives, Partnerships)
	Sustainable Economy
	Productive chain (traceability)
	Consumption
	Market
Education	Continued Education
	Education for Sustainability
	Dissemination of knowledge and learning
Governance	Jurisdiction
	Network management
	Local actors
	Conflict management
	Stakeholders
	Planning / management (land use planning, sustainable coastal management, watershed management, mapping)
	Tourism
