## What moves us

**“We believe in the power and leadership of companies to propagate positive impact”.**

Our purpose is to integrate biodiversity conservation into business models.

# Global Operations

Operations in Europe and Latin America.

# LIFE Biodiversity Credits

LIFE Biodiversity Credits represent the Nature Positive balance of an organization discounting its pressure on biodiversity, being a tangible and traceable record of the net result of positive actions for biodiversity in an area.

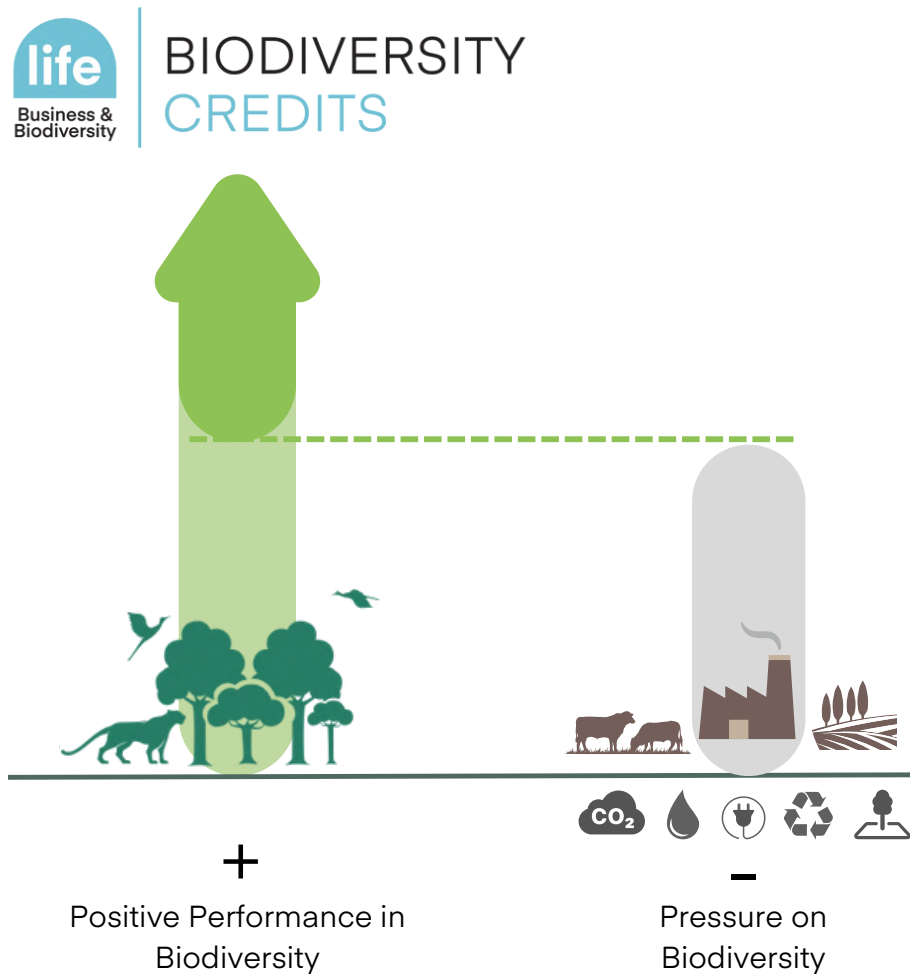

This result is assessed through a rigorous process of independent auditing and certification.

# LIFE Biodiversity Credits

The positive balance has a tradable value in the market and can be negotiated as a biodiversity credit.

# How Does This Process Work?

1. Company's decision to enter the biodiversity credits market
2. Implementation phase:
  - a. Acquisition of LIFE Key Software (directly from the LIFE Institute)
  - b. Conducting a Diagnosis (consultant support - optional)
    - i. Biodiversity project qualification
    - ii. Biodiversity Pressure calculation
    - iii. Management Indicator assessment
  - c. Balance results
    - i. Nature Positive: LIFE Certification + Biodiversity LIFE Credits
3. Negotiation of LIFE Biodiversity Credit
  - a. With companies interested in LIFE Certification
  - b. Through the disclosure of credits in the market (LIFE Platform)
