

Biodiversity Credits – Assessments and Certification Processes

Company/Project	Certifying Body	Estimated Credit	Status	Country	Ecoregion	Project's description	Contact
Caiman Agropecuária	Neocert	502.840,55 (Pantanal) 72.244,44 (Cerrado)	Phase 2 audit carried out	Brazil	Pantanal and Cerrado	Having the ecotourism as the main driver of actions for conservation and preservation of the Southern Pantanal, the initiative combines livestock farming with biodiversity conservation projects, including fauna and flora monitoring actions and reintroduction of fauna species, with emphasis on the creation of a Private Natural Heritage Reserve Dona Aracy with 5.6 thousand hectares.	caiman@caiman.com.br
C-Pack	Tecpar Cert	31.412,93	LIFE Certified Company in credit analysis process	Brazil	Serra do Mar coastal forest	Ecological restoration program, control of pine species in an area of the Serra do Tabuleiro State Park (in the State of Santa Catarina, South of Brazil).	mauricio@c-pack.com.br
SPVS	Neocert	748.922,08	Under assessment	Brazil	Serra do Mar coastal forest	Located in the heart of the Great Atlantic Forest Reserve, the Guaricica Natural Reserve covers 8,677.33 hectares in the Cachoeira River basin, Antonina, in the State of Paraná. With the acquisition of a group of farms and the hiring of most of the employees who worked on them, it was possible to begin a broad restoration process in areas at different stages of conservation. Today, 56% of the Guaricica Natural Reserve comprises a Private Natural Heritage Reserve, according to Brazilian law.	corporativo@spvs.org.br
Aliança 5P	N/A	-	Under assessment	Brazil	Pantanal	Initiative by a group of investors, owners of 12 farms in the Pantanal, which aims to form one of the largest private wildlife corridors on the planet. The project covers at least 536 thousand contiguous hectares.	alianca5P@outlook.com
Projeto de Carbono Florestal Resex Rio Cautário	N/A	TBD	Under assessment	Brazil	Madeira/Tapajós moist forests	Conservation project in the Rio Cautário State Extractive Reserve (RO) in the REED+ modality (Reduction of Emissions from Deforestation and Forest Degradation), with the objective of reducing carbon emissions, rewarding the community and implementing the Management Plan and Use Plan.	alice.alexandre@permianglobal.com
Fazenda Tamanduá	TBD	TBD	Under assessment	Brazil	Caatinga	Located in the municipality of Santa Teresinha (PB), the Private Natural Heritage Reserve at Tamanduá Farm has 325 hectares dedicated to the conservation of biodiversity in the Caatinga biome. The reserve houses and protects a significant variety of species, including endemic and endangered species. Recognized as an important area for birds (IBA – Important Bird Areas), the reserve has already received wild fauna species for release and has illustrated books published about local fauna and flora.	rinaldo@axialpar.com.br
Posigraf	Tecpar Cert	36.836,83	LIFE Certified Company in credit analysis process	Brazil	Araucaria moist forests	Adoption of the Private Natural Heritage Reserve Mata do Uru Mata do Uru, in Lapa, State of Paraná, which has an area of 129.6 hectares and is home to remnants of the Araucaria Forest (76% of the Reserve area) and Natural Fields.	giem.posigraf@positivo.com.br
Itaipu Binacional	Tecpar Cert	1.084.794,40	LIFE Certified Company in credit analysis process	Brazil	Alto Paraná Atlantic forests	Implementation, management and maintenance of more than 25 thousand hectares of protected areas (Santa Helena Biological Refuge, Protection Strip, Bela Vista Biological Refuge and Maracaju Biological Refuge), recognized by UNESCO as core zones of the Biosphere Reserve due to their ecological value for humanity.	lcrsilva@itaipu.gov.br
Gaia Silva Gaede Advogados	Tecpar Cert	9.604,49	LIFE Certified Company in credit analysis process	Brazil	Araucaria moist forests	Support for the maintenance of Private Natural Heritage Reserve, located in Curitiba (State of Paraná), with 36 thousand m ² of area with Araucaria Forest (Atlantic Forest biome) and support to the Association of Protectors of Green Areas of Curitiba and Metropolitan Region (APAVE) which operates in the preservation and conservation of green areas and natural resources in Curitiba and the Metropolitan Region.	rodrigo.sluminsky@gsga.com.br

OCB Forestry	Neocert	11.039,10	Under assessment	Brazil	Cerrado	With the operationalization of its forest remnants, OCB aims to guarantee the conservation and preservation of biodiversity and ecosystems present in its areas. With the implementation of robust monitoring of forest fires and the operationalization of its legal reserves, the company seeks LIFE certification in biodiversity conservation to reaffirm its commitment to sustainability and the environment.	rogerio@gerflor.eng.br
M. I. Incorporadora	Neocert	682.191,25	Under assessment	Brazil	Madeira/Tapajós moist forests	Cabaça Farm I and II, located in the municipality of Borba, State of Amazonas, covers an area of 82,809.7299 hectares and is managed by M. I. INCORPORADORA. It stands out for preserving 100% of its native forest cover. With all efforts aimed at ensuring the non-anthropization of its area, the company's actions are directed towards the creation of protection areas and conservation projects that seek to generate carbon credits through avoided deforestation (REDD+) and biodiversity credits (LIFE), guaranteeing the integral preservation of its areas and ecosystems located there.	rogerio@gerflor.eng.br
YACO	Neocert	860.712,21	Under assessment	Brazil	Southwest Amazon and Madeira/Tapajós moist forests	Adding more than 100,000 hectares of total area, distributed across 5 properties in the Legal Amazon, YACO, a company with a solid base of environmental awareness and sustainability, stands out in the management of carbon credit trading and the preservation of native forests. With a firm commitment to environmental responsibility and innovation, the organization expands its actions to capitalize on biodiversity conservation through actions to create protected areas on the 5 properties, contributing to the protection and conservation of natural ecosystems.	rogerio@gerflor.eng.br
Incorporadora Manicoré	Neocert	316.557,56	Under assessment	Brazil	Madeira/Tapajós moist forests	The Lagoa Grande Farm II, with its native forest cover fully intact, covers a total area of 39,622.8300 hectares, representing a valuable forest remnant. In this context, the preservation of these lands and the ecosystems that exist on them is extremely important. Incorporadora Manicoré is solidly and responsibly committed to finding ways to capitalize on the environmental services provided by this area. To this end, in an area of 6,913.077 hectares, the organization concentrates its conservation actions; among them the implementation of REDD+ Projects and other initiatives aimed at obtaining biodiversity credits, including LIFE certification through the creation of areas that are not formally protected.	rogerio@gerflor.eng.br
Christian Dobreiner - Reserva Araponga	TBD	39.767,21	Under assessment	Brazil	Araucaria moist forests	Located in the municipality of Santa Rosa de Lima, State of Santa Catarina, the Araponga Reserve has 215.23 hectares dedicated to the conservation of biodiversity in the Atlantic Forest Biome. The area is located in a priority area for conservation, shelters and protects species of flora and fauna, some endemic and threatened with extinction, and is registered by ICMBio as an area for the release of wild animals. Various activities are developed, such as environmental education with the publication of comic books, fauna monitoring, as well as support for various conservation events, such as the Araponga Festival, with bird watching, and support for local agroecological activities.	cdobreiner@gmail.com

*TBD: To be determined.
